

MONROE Air Blade Warning Light

Keep Safety at the Forefront

Universally-mounted, the Air Blade Warning Light improves public safety by projecting a powerful amber or green light so drivers can have better visibility of snow removal equipment in harsh winter conditions.

FEATURES

Military Grade 6500k LED Solid or Flashing Light for Multiple Applications

4 LED Lights Per Square Inch

Flexible Polyurethane Circuit Board is Fully Encapsulated for Vibration, Moisture and Corrosion Resistance

Long Lasting 3M VHB™ Adhesive Backing is Weather-Proven to Stand the Test of Time

2 AMP Draw Per Light

2 Wire, 18GA Cable Connection

Standard Air Blade - 960 Lumens
Tapered Air Blade - 2,380 Lumens

Improves Public Safety

When visibility is difficult, the Air Strip warning light helps people properly navigate avoiding snow apparatus.

Powerful & Durable

Military grade LED mounted with 3M adhesive that actually cures stronger over time.

No Drill Installation

Eliminates bolts, screws or rivets that can loosen, rattle or cause areas of corrosion.
